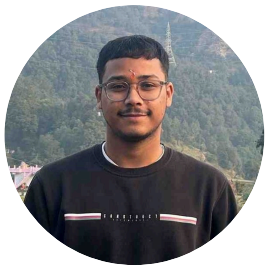
PRIYANSHU BISHT

bishtpriyanshu3542@gmail.com +91 6397982677 Dehradun, Utarakhand

www.linkedin.com/in/priyanshub3542 github.com/priyanshub3542



Profile

A Computer Science student with hands-on experience in developing real-time applications and intelligent systems. Skilled in solving practical problems through scalable solutions, with a strong foundation in software development and a focus on building impactful, real-world applications.

Education

Bachelor of Technology in Computer Science and Engineering(CGPA of 6.5), 08/2022 – Present
Graphic Era Hill University, Dehradun Uttarakhand, India

CBSE Board, 12th Class (82%), *Parwati Prema Jagati Saraswati Vihar, Nainital* 05/2021 – 04/2022
Uttarakhand, India

CBSE Board, 10th Class (88%), *Parwati Prema Jagati Saraswati Vihar, Nainital* 05/2019 – 04/2020
Uttarakhand, India

Technical Skills

Programming Languages
Python, C language, JavaScript, MySQL, React, Next.js,

IDE
Visual Studio Code, Code::Blocks

Systems/Tools
Git, Linux, GitHub

Concepts & Paradigms
Data Structures & Algorithms, Object-Oriented Programming, Operating System, Computer Networks

Projects

Dentwise: AI Appointment SaaS , *TypeScript, JavaScript, SQL* 10/2025 – 02/2026

- Architected a scalable dental management platform utilizing **Next.js 15**, **TypeScript**, and **Prisma/PostgreSQL** for optimized practice workflows.
- Engineered a real-time **AI Voice Assistant** with **Vapi AI**, facilitating autonomous patient guidance and query resolution.
- Optimized patient lifecycles by automating secure authentication via **Clerk** and communication workflows through **Resend (Email)**.
- Developed a high-performance, responsive UI using **Shadcn UI** and **Tailwind CSS**, ensuring a seamless, cross-platform user experience.

Civic Connect - A Real-Time Local Issue Reporting Platform , *MongoDB, ReactJs, NodeJs* 03/2024 – 11/2024

- Developed a full-stack web application for reporting and tracking civic issues, connecting citizens with authorities
- Built features including image-based issue reporting, geolocation mapping, community upvoting, and real-time status tracking
- Designed a client-server architecture with secure authentication and efficient database management
- Integrated interactive maps, file uploads, and PDF generation, along with a responsive and user-friendly interface

Video Surveillance Anomaly Detection System (Machine Learning Project), 11/2025 – Present
Tech Stack: Python, PyTorch, OpenCV, YOLO, CNN-LSTM, Computer Vision

- Developed a real-time video surveillance system for anomaly detection using deep learning and computer vision
- Implemented crowd detection (CSRNet), fire/smoke detection (YOLO), and violence detection (CNN-LSTM) models
- Designed a pipeline to process video frames and generate real-time anomaly alerts
- Used Python, PyTorch, TensorFlow, and OpenCV for model development and video processing
- Optimized performance using CUDA and built a real-time monitoring interface with Streamlit

Achievements

AWS JAM DAY - Participation Certificate 12/01/2024
Hands-on learning in Generative AI, Cloud Engineering, and Machine Learning.

SQL Certification
Advanced understanding of database management and query optimization.

IBM Introduction to Cybersecurity Tools Cyberattacks - Coursera
(Cybersecurity Tools Cyberattacks)
